Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-27, 30 and 36, drawn to a gene targeting construct comprising a rod outer segment (ROS) targeting signal, a vector or a cell or a gene disrupted mouse comprising the construct, classified in class 435, subclass 320.1, or class 800, subclass 13.
- II. Claims 28 and 37, drawn to a cell extract, classified in 435, subclass 325.
- III. Claims 29 and 38, drawn to a substantially purified transgenic polypeptide, classified in 530, subclass 350⁺.

The inventions are distinct, each from the other because:

Invention I and invention II are two mutually exclusive and independent products. The cells of invention I can be used to make transgenic mouse. The extract of invention II can be used to isolate membrane.

Invention I and invention III are two mutually exclusive and independent products. The cells of invention I can be used to make transgenic mouse. The protein of invention III can be used to make antibody.

Invention II and invention III are two mutually exclusive and independent products. The extract of invention II can be used to isolate membrane. The protein of invention III can be used to make antibody.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, because of their recognized divergent subject matter, and the search required for any group is not required for remaining groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liping Chen, whose telephone number is (703) 305-4842.
